Low Fire Glazes

Duncan Satin Glazes

Satin Glazes are so named because of their soft, muted sheen. They move very little during firing, which makes them ideally suited for creative design work and controlled glazing techniques. All Satin Glazes are nontoxic, overglaze compatible and safe for use on food containers.

Laguna Mystic Glazes

These radical glazes redefine "break-up" at Cone 5. The mottled and shimmering colors create an exciting, almost "dancing effect" whether on functional or art ware. Dry Mystic Glazes available by special order.

Duncan Concept Underglazes

Underglazes

Concepts are underglazes for use on bisque. Can be used with or without clear glaze. These glazes represent a new generation in fired color. Versatility and ease of use make them ideal for both the casual ceramicist and professional alike. One stroke allows for translucent design work. Three strokes provide solid coverage. Concepts can be used with a variety of decorating techniques. Offered in a balanced palette of compatible hues for ease of color selection.

Underglazes

Duncan E-Z Stroke Underglazes

E-Z Strokes have become popular because of their versatility. Their translucent quality makes them suitable for use with a number of decorating techniques including airbrushing, antiquing, and brushwork. One stroke is all you need for most design work. One or two additional strokes may be added for depth and shading while the color is still wet. E-Z Strokes may be applied over most underglazes, including Cover-Coats and other E-Z Strokes colors, allowing the base color to show through. They may also be used to tint slip, most glazes, and other E-Z stroke colors. E-Z Strokes fire from cone 06 to cone 6.

Underglazes

AMACO Velvet Underglazes

AMACO Velvet semi-translucent underglazes offer two finish possibilities. When left unglazed, they have the appearance of velour or velvet. They will assume a soft satin matte finish when glazed with a transparent matte glaze and will intensify when covered with a transparent gloss glaze.

Dry Glazes

Laguna High Fire Glazes

Laguna Dry Raku Glazes

Laguna Raku glazes are lead free and were developed especially for Raku firing. Raku glazes are best dipped or poured, and are prepared by simply adding water to the glaze and mixing to the consistency of thin paint. Do not screen the liquid. Dip, pour or brush on to pottery.

Laguna's cone 10 glazes contain many traditional high fire glaze colors. These glazes are lead-free. Best results for most are achieved with medium reduction firing. These glazes are available by special order.

Dry Glaze Tip

Darren Cockrell
Operations Manager

Dry glazes are less expensive and more versatile than liquid glazes. They can be easily adjusted for different application methods, whether it be dipping, spraying, or brushing.

We have a free fact sheet available to help you achieve excellent results.

Tom Coleman Dry Showcase Glazes

This series includes some of the best glazes used by world famous potter Tom Coleman. These glazes were developed and refined by Tom during the last 32 years he has been making a living creating in clay. All glazes require cone 10 reduction firing. All are lead free.
