Kiln Shelves

Thorley Kiln Shelves

Thorley kiln furniture is manufactured using superior quality body formulations, well regulated production and quality control procedures, and an exceptionally long and tightly controlled firing cycle. These procedures result in a finished product composed of 50% cordierite and 35% mullite, with lesser amounts of corundum and other combined mineralogical forms. This combination of high cordierite and high mullite yields excellent mechanical properties and the remarkably high resistance to thermal shock unique to Thorley kiln furniture.

Nearly half the weight of traditional kiln shelves and just as strong. Less likely to propagate cracks through their cores.

Nitride-Bonded Kiln Shelves

Nitride-Bonded Silicon Carbide Kiln shelves are light weight, offer exceptional strength at cone 11, and feature superior glaze release properties.
